

Portable cots Travel

For the transport can be the travel cot, provided it is equipped with a folding mattress, together with the mattress pack in a carry bag and stow easily in almost any car boot. Separate travel cot mattress can be at least space-saving roll up and take with you. In order for the construction of the [Luxury baby gifts](#) actually runs after arrival without any difficulty, it is highly advisable that new acquisition previously had home up in peace and to have broken down. Constructive peculiarities are then already known. Imagine: your baby is tired and fusses, but the travel cot jammed.

Travel cots in Test

Last year, "Ökotest" tested once again and very particularly taken nine children travel beds under the microscope. The prices were very different, and ranged between 35 and 150 euros. The fabric of all test models consisted mainly of polyester. In addition to a comprehensive review on various ingredients all models have been tested mainly in terms of their practicality.

The best of the investigated models were rated "good" and "satisfactory". However, there were also beds that despite good practice characteristics due to the high pollution levels only "poor" were given a and thus fell through. Most travel cots were set up fairly straightforward and without tools after thoroughly reading the manual and follow the step by step instructions. But be careful! There are models in which children as soon as they get up in bed, can get between tubular structure and frame with her feet. The safest proved the travel cot Baby Bjorn. In this model, the mattress lies directly on the bottom of the crib. As a parent, you must be especially vigilant that the overall risk of injury remains as low as possible both for your child and for yourself. So meshed grilles are important, for example to prevent a Stuck. Look for rounded corners and well padded handles and handrails.

Tent place bed?

For some years there are travel beds that look when set up as a mini tent. Here, the term "structure" is not quite accurate for these constructions. A sophisticated "Pop up system" the

baby tent works as it were apart of its own accord. Even the folding works with a little practice at lightning speed. Mostly a self inflating air mattress is provided, from which the air when needed, ie, For mixed packing, also can be let out again. Especially in air travel is such a travel cot, a very practical thing. The pack size go mostly does not go beyond 15 times 45 centimeters and the weight is between three and four kilograms so that it can take even as hand luggage. The deck area is also here 1.20 meters by 60 centimeters, making for children up to about four years of age. Many children use such as travel beds also play tent or parents take as a sunscreen to the beach.

However, apart from the numerous advantages of the tent-like travel cots also have some disadvantages. The child can not be put on top and the parents can see it poorly through the tent walls. Better visibility offer models with mesh walls, such as of Hauck, Herlag or Chicco. Nevertheless, you need fairly close approach to take a look at your child can. Overall, therefore, recommended more for children who are a bit bigger and independently can crawl in her travel cot.
